

COSHH (Control Of Substances Hazardous To Health) Training

BASICS

COSHH training by UK Construction Training can either be carried out at our training centre in London or, provided your premises or site has both an area for the practical training and an indoor room in which to carry out the theoretical elements of the course, we can also conduct the training at any location of your choice nationwide. A minimum of 4 delegates are required for an exclusive training course at your location.

Those who should attend are those persons responsible for using, handling, transporting and storing hazardous substances

THE COURSE

Most courses start between 8.00 and 9.00am and finish at approximately 3.00 – 3.30pm. In just one day delegates can learn the basics of identifying, measuring and controlling exposure to harmful substances, thereby safeguarding themselves and their colleagues. This re-designed one-day course is an excellent stand-alone learning opportunity, which has the added benefit of also contributing towards the NEBOSH Modular National General certificate, should you wish to continue your safety education at a later date.

Delegates will learn:

- The ways in which substances can harm health and how they enter the body
- How to define exposure limits
- How to measure exposure and conduct COSHH assessments in accordance with the Regulations
- Practical control measures including local exhaust ventilation and safe systems of work
- How to compile and maintain the necessary records.

COST

The price per person, excluding VAT is as follows:

| No of Delegates | Price |
|------------------------|--------------|
| 1 – 8 | £145 |
| 9 – 12 | £125 |

I hope this meets with your approval and we look forward to receiving your instruction in the very near future. In the meantime and should you wish to contact us please telephone 0870 8507964 or email admin@ukconstructiontraining.com

Assuring you of our best attention at all times,

UK CONSTRUCTION TRAINING LTD
